

Customized linguistic quality assurance solutions

Alpha CRC provides customized localization quality assurance (LQA) solutions through an innovative online portal, ensuring high standards and real-time updates for clients. Their flexible approach ranges from simple single-step reviews to complex multi-stage processes, enhancing linguistic quality and empowering client decision-making with detailed reporting and notifications.

- **Improved** access to data insights for clients
- **Empowered** client decision-making
- **Improved** linguistic quality via refined datapoints

Use Case description

Alpha CRC expertly crafts and executes tailored localization quality assurance (LQA) solutions to meet the high standards of their clients, ensuring the delivery of superior localized content.

Its innovative online LQA portal streamlines the process, offering a range of services from single-step reviews to intricate multi-stage procedures, while keeping stakeholders updated with real-time notifications and reporting.

• Custom LQA solutions

Challenge

Clients require high-quality localized content that meets their specific standards

Solution

Alpha CRC's solution architects design and implement smart, transparent, and customized LQA solutions that align with clients' unique requirements. Whether the need is for a straightforward single-step review or a comprehensive multi-stage process including launch, review, validation, rebuttal, arbitration, and delivery, Alpha CRC configures the workflow within their innovative online LQA portal. This portal not only facilitates a seamless process, but also ensures that all stakeholders are kept informed with timely notifications at each action point with the aid of real-time reporting facilities.
